

Not Getting Enough out of Your MDR?

Get DeepSeas MDR+

IF YOU HAVE EXPERIENCE WITH MANAGED DETECTION & RESPONSE, YOU KNOW WHAT YOU NEED IN YOUR MDR PROVIDER: CONTINUOUS TRANSFORMATION AND PERSISTENT DEFENSE THAT IS PERSONALIZED TO YOUR ORGANIZATION'S UNIQUE NEEDS.

Organizational Alignment that Feels Tailor-Made

- ShapeShapeShapeShapeYour typical Managed Detection &
- Response provider will feel inflexible and unable to adjust and grow
- with you as your needs and environment evolve. MDR+ by DeepSeas
- will integrate with your organization in a way that feels
- personalized.

Perceptive Guidance You Can Trust

- Do you have a service delivery executive who is familiar enough with your environment and
- organization so that you trust her/his advice? That's what DeepSeas MDR+ brings to the
- table. You can trust your service delivery exec from DeepSeas to be in the right position to
- guide you and your overall security program transformation.

100% Transparent Access to 100% of Your Data

- You need meaningful access to your own data. Don't assume you'll get that with every
- Managed Detection & Response service. With DeepSeas MDR+, you will get transparent
- access to all your data, which we will be continually monitoring to provide you with persistent
- defense.

The "Last Mile" Shouldn't Be the Most Costly

You don't have to choose between a large, expensive cyber defense build and a fully scaled, offsite as-a-service provider. DeepSeas MDR+ will provide the "last mile" of integration, in which your cyber defense is tightly integrated with your organization. All the while, we'll be keenly aware of key decision makers and operational personnel across the business and efficiently providing our tradecraft at scale.

More than Just More Alerts

Unfortunately, most managed security providers that you could hire can make your problems worse. Most Managed Security Service Providers (MSSPs), including many MDR providers, will send you unqualified event alerts, which translates into more noise and confusion on top of your already strained security operations. Rather than sending you more alerts, with DeepSeas MDR+, you'll get threat context, situational awareness, and prescriptive actions for your team to take. We'll help you effectively prioritize and contain in-progress events requiring immediate action.

More than Traditional Managed Detection & Response

Meet DeepSeas MDR+

Providing more than traditional Managed Detection & Response services, DeepSeas MDR+ gives you 24x7 advanced threat detection, superior attack surface visibility, and high-touch response support. DeepSeas MDR+ integrates with your existing security tools and optimizes your technology investments.

The Power Behind MDR+

The DeepSeas Cyber Defense Platform is a proprietary security analytics engine that delivers scalable threat detection, advanced alert correlation, robust data enrichment, and automated response workflows to your security team.

- > **Adaptive Threat Defense**
- > **Curated Threat Intelligence**
- > **Supervised Machine Learning Analysis**
- > **Proactive Triage & Response**

DeepSeas MDR+ comes with a unique-to-you service engagement model that aligns to your existing capabilities and business processes.

- > **Begin detecting threats in as quickly as a few days with guided deployment support.**
- > **Be the first-to-know through meaningful threat intelligence briefings.**
- > **Understand the effectiveness and ROI of your cybersecurity investments.**

Don't Take Our Word For It

More than simple service providers, partnering with MDR vendors in the mid-market is quickly becoming a core operating strategy in the growth and maturity of modern security programs. Vendors like DeepSeas have an opportunity to contribute more than MDR/XDR, helping organizations efficiently manage the business risk posed by cyber threats.
