

# DeepSeas CISO Advisory Programs

If you're responsible for transforming your organization's cyber defense program, a DeepSeas vCISO or Deputy CISO can help you fill critical gaps in your leadership team.

- ❑ Are you a mid-sized organization struggling to find a cost-effective way to bring cybersecurity expertise in-house?
- ❑ Are you a CISO or CIO and need a Deputy to lead transformational cyber defense projects?
- ❑ Are you a CEO, COO, or CFO and challenged to navigate complex data security regulations and potential business risks?
- ❑ Are you ready to transform your cybersecurity program but operate in a highly regulated industry?

## Your Unique Challenges Require a Tailored Program

Whether you are looking for an interim CISO, an experienced Deputy CISO to support your current cybersecurity team, or a long-term solution, DeepSeas CISO Advisory will provide the executive leadership you need as a subscription service. Our battle-hardened experts know how to align information security strategies with your organization's unique needs and challenges.

## What You Can Expect from Your DeepSeas CISO or Deputy CISO

- > An organized and straight forward approach outlining privacy and security policies, standards, procedures and guidelines
- > Development, direction, and management of your in-house security team on an interim or ongoing basis
- > Engagement with executive management across the leadership spectrum to create clear communication and strategic focus
- > Guidance of risk assessments on enterprise, application, and operational security
- > Up-to-date threat intelligence and management of enterprise security
- > Crisis management

## Choose the CISO Advisory Program that Works Best for You

DeepSeas CISO Advisory will help your organization prepare for, protect against, and prevent cyber threats, transforming your cybersecurity program while aligning to your organization-wide goals and overall technology strategies.
